Abstract (en)

A water dispensing device with spray head, particularly for sinks or similar hygienic-sanitary fixtures, with improved manoeuvrability. The device comprises: - a device body (2) that can be associated, by one of its ends, with a hygienic-sanitary fixture such as a sink or the like and in which at least one duct for the passage of water (3) is defined; - a dispensing spigot (5), which is connected, by one of its ends, to the device body (2); in the dispensing spigot (5) a corresponding duct for the passage of water (6) being defined which leads out through a dispensing outlet (7) and is connected to the water passage duct (3) that is defined in the device body (2); - an arm (8), which is associated, by one of its ends, with the dispensing spigot (5) and terminates in a dispensing spray head (9); in the arm (8) a corresponding water passage duct (10) being defined which can be connected to the water passage duct (3) that is defined in the device body (2). The arm (8) is articulated to a region of the dispensing spigot (5) which is spaced apart from the end of the dispensing spigot (5) that is connected to the device body (2).
