Abstract (en)
[origin: WO2014044983A1] The invention relates to a suitcase including a main body (10) and a base (20) supporting three wheels (30) suitable for being in contact with the ground (S), the contact areas between the wheels and the ground forming a supporting polygon. The main body can pivot relative to the base between a static position and a dynamic position. The invention also relates to a set of suitcases (1000) comprising first (1) and second (100) suitcases. The surfaces of the suitcases can be attached to one another and are provided with openings. The openings can be placed opposite one another when the surfaces of the suitcases are attached to one another and comprise a closing system suitable for isolating or providing access to the inside of the suitcases.
