Abstract (en)  
[origin: US2014084542A1] A game piece with swappable base and method of swapping bases is provided. The game piece includes a base having a selector disk rotatably engaged with a base disk, and a label positioned between the selector disk and the base disk, and a figure having a platform and a character. The base disk includes a figure retaining area, such that the platform of the figure is configured to be removably secured with the area. A second base may be provided having a second selector disk rotatably engaged with a second base disk, and a second label positioned between the second selector disk and the second base disk. The second base disk includes a figure retaining area, such that the platform of the figure is configured to be removably secured with the area of the second base. The figure may be swapped between the first base and the second base.
