Abstract (en)

[origin: WO2014044795A1] The invention relates to a jaw crusher (1) for comminuting material to be crushed, comprising at least one crusher jaw (10) which is arranged on a receiving body (11), said crusher jaw (10) comprising, on a first jaw edge (12), a clamping element (13) which surrounds one edge (14) of the receiving body (11). According to the invention, a wedge body (15) which wedges the crusher jaw (10) against the receiving body (11), by means of a second jaw edge (16) opposite the first jaw edge (12), is provided, such that said crusher jaw (10) is tensioned on the receiving body (11) forming tensile stress between the jaw edges (12, 16).
