Abstract (en)

[origin: WO2014044398A1] The invention relates to a processing device and a method for processing a stack of bags consisting of a plurality of bags, wherein a deposition device is provided on which the stack of bags is deposited in a base position. The bags in the stack of bags have a bag length and a bag width. A centring device is provided, which comprises two oppositely arranged centring units which are arranged so as to be relatively movable toward one another and away from one another by means of a drive device.
