Abstract (en)
[origin: WO2014044605A1] The present invention relates to a saddle underlay (10) for placing on an animal to be ridden comprising at least one sheet structure (11), wherein said sheet structure (11) is formed from a plurality of spring elements (14). In order to ensure improved ventilation, the invention proposes that at least one spring element (14) has a passage (16) for air circulation and discharging moisture. The invention further relates to a saddle system (40) comprising a saddle underlay (10) according to the invention.
