Abstract (en)
[origin: WO2014045049A1] The present invention relates to electrolysis electrocatalysts and their use in an electrolysis process for example in the electrolysis of water, more particularly for producing hydrogen at the cathode of a water electrolyser or producing oxygen at the anode of a water electrolyser as well as a water electrolyser comprising such an electrocatalyst. The electrocatalyst employed in the present invention comprises a combination of palladium and iridium.
