Abstract (en)
[origin: WO2014044590A1] The invention relates to a refrigeration appliance having at least one container (104), which is arranged in the interior of the refrigeration appliance and is intended for accommodating articles, wherein the container (104) has a basic body (200) and a door (106, 108), which is mounted on the basic body (200) such that it can be displaced between an open position and a closed position. The invention provides a drive element (400) for assisting displacement of the door (106, 108) mechanically.
