Abstract (en)

[origin: WO2014044617A1] The invention relates to a method for providing data associated with a vehicle comprising providing a vehicle (1) having a vehicle unit (11) for determining first data, which indicate a state of the vehicle, and providing a portable multi-function device (2) having a sensor apparatus (21) for determining second data and a storage apparatus (22) for storing the first and second data. The portable multi-function device (2) can be coupled to the vehicle (1). The first data are determined by means of the vehicle unit (10) and the second data are determined by means of the sensor apparatus (21) of the portable multi-function device (2). The first data are transferred to the portable multi-function device (2) and stored together with the second data in the storage apparatus (22) of the portable multi-function device (2). The first and second data can be transferred from the portable multi-function device to a remote data recording apparatus (3).
