Abstract (en)

[origin: WO2014044586A1] The invention relates to a method for the wireless transmission of data relevant to a vehicle, in the context of C2X communication with a vehicle or an infrastructure unit. In order to facilitate the introduction of C2X communication, at least part of the data is additionally generated as speech messages by means of an additional speech message transmission unit (2). A corresponding communication device is also described.
