Abstract (en)
[origin: WO2014044361A1] The present invention relates to a plug connection comprising a first plug connector and a second plug connector, wherein the plug connectors each have at least two contact elements, wherein the contact elements of the first plug connector make contact with the contact elements of the second plug connector at contact points in the plug-connected state of the plug connection, characterized in that the contact elements of the two plug connectors (1, 2) are designed in the form of contact lugs which project into a free space and can be elastically deflected.
