Abstract (en)
[origin: EP2898784A1] A filter cigarette (10) comprises a tobacco rod (12) wrapped with a cigarette paper (14) having a basic porosity and a filter (16) attached to an end of the wrapped tobacco rod (12) by means of a tipping (18). The cigarette paper (14) includes at least one first circumferentially extending band-like zone (20) having a lower porosity than the basic porosity and one second circumferentially extending band-like zone (22) having a lower porosity than the basic porosity and being longitudinally spaced to the at least one first band-like zone (20). The second band-like zone (22) has a lower diffusivity than the at least one first band-like zone (20).
