Abstract (en)
[origin: CN204617377U] The utility model relates to a health treatment facility (1), health treatment facility includes main part (2), the main part is used for accomodating: including a motor, an end cap, a controller, and a cover plate. At least one processs head (4), at least one process head be used for by motor drive, illumination mechanism, illumination mechanism is used for illuminating the pending region on the skin, illumination mechanism is close to process head (4) and arrange, main part (2) cover at least in part has the shell of being made by plastics (four to six -tenehs 1, 62), the shell makes light pass through and the molding is in on main part (2). According to according to the automatic silicon steel sheet leveling machine of the transformer, main part (2) have the hole, the hole be link up and neighbouring illumination mechanism, the hole completely by shell (four to six -tenehs 1, 62) covers to form illumination window (8).
