Abstract (en)

[origin: EP2898869A1] Perineal shower, of the type used for personal hygiene close to or in the toilet bowl, in place of a bidet, supplying water by means of a hose (3) and a showerhead (4), characterised in that it comprises a tap (1, 1.1 and 1.2) integrated in one single piece, formed by a part to be built in and another external part, positioned on its free end, corresponding to the on/off control knob (2, 2.1), with a similar configuration to the tap (1, 1.1 and 1.2), in terms of size and structure, presenting in its interior a cavity (5) that when positioned vertically allows the fixing of the showerhead (4), with the result that when it is freed from being fixed, the on/off control knob (2, 2.1) can be operated by being turned to the right or the left, resulting in oblique positions that prevent the fixing of the showerhead (4).
