Abstract (en)

A tube lamp support (30) includes a first fixing member (31) and a band-shaped second fixing member (32). The second fixing member (32) engages the first fixing member (31) and supports a tube lamp (20) from below the tube lamp (20). The second fixing member (32) includes a first end portion having therein multiple first openings (32b) having a predetermined size provided along a longitudinal direction of the second fixing member (32) at equally-spaced intervals, and a second end portion having therein multiple second openings (32c) provided at equally-spaced intervals. The multiple second openings (32c) and the multiple first openings (32b) differ at least in one of a size of the opening and spacing of the opening.
