Abstract (en)

[origin: WO2014049170A1] The invention relates to a device (5) for slicing several food products (2), in particular sausage, ham, and/or cheese, wherein a respective track (7) is provided for each food product (2), along which track the food product is transported in the direction of a moving blade (11). The invention further relates to a method for slicing at least two food products in two separate tracks (7). Each food product is transported along a track in the direction of a cutting blade (11) by a transport means (4). The cutting blade cuts food slices from the food product (2).
