Abstract (en)

[origin: US2014087034A1] The invention relates to a package for protein containing foods comprising a sealable food covering and, in the interior of the covering, a permeable container wherein an oxidizer is in the permeable container oxidizer substantially irreversibly reacts with biogenic amines within the covering to form compounds without objectionable odor or toxicity; in another embodiment the invention provides a package for protein containing foods comprising a sealable food covering and, in the interior of the covering, a permeable container wherein an unreactive absorbent is in the permeable container and the unreactive absorbent absorbs, but does not react with biogenic amines within the covering to largely remove the biogenic amines from the package.
