Abstract (en)

[origin: WO2014048417A1] The invention relates to a method for treating a liquid, comprising the steps: introducing the liquid to be treated into a reaction chamber, subjecting the liquid to ultrasound, irradiating the liquid with UV radiation as the liquid is being subjected to ultrasound, and discharging the treated liquid from the reaction chamber. The method is characterised in that as the liquid is being subjected to ultrasound and is being irradiated with UV-radiation, the liquid is simultaneously permeated by a gas.
