Abstract (en)
[origin: WO2014049277A1] The invention relates to a method for producing a ground anchor, in which: a drilling tool is provided, which includes a drilling tube (12) having an open distal end (14) and a means (20) for vibrating the drilling tube; a drill-hole (F) is made in the ground (S) by means of the drilling tool (10) by vibrating the drilling tube (12), the drilling tube being taken to a predetermined depth; once the drilling tube (12) has reached the predetermined depth, a reinforcement (30) is inserted in the drilling tube (12) and a sealing grout is injected into the drill-hole (F) via the drilling tube before or after having inserted the reinforcement in the drilling tube.
