Abstract (en)

[origin: WO2014048951A1] This tube (10) for a motor vehicle heat exchanger extends in a longitudinal direction and has a transverse cross-section. The tube (10) comprises, on the inside, a plurality of longitudinal channels (12) for the circulation of a fluid and at least a portion of the channels is distributed in the transverse cross-section of the tube (10) in such a way as to define two rows (15) of channels (12).
