Abstract (en)  
It comprises a side loading container (100) having at least one discharge area (130) for emptying its contents into a waste collection vehicle (200), and releasably mounted means (140) for attaching the container (100) to the vehicle (200) comprising at least one coupling body (150) arranged in a wall (115) in said discharge area (130) defining at least one interior space (160; 165) tapering toward the top thereof and suitable for receiving a coupling member (216) of the waste collection vehicle (200). Means (300) for retaining and positioning the container (100) on the ground (350) are also provided comprising at least one recess (126; 127) arranged in a base of the container (100) adapted to receive at least one complementary projection (305; 310) to be anchored on the ground (350).
