Abstract (en)

[origin: WO2014053490A1] An easily producible security feature (200) according to the invention contains at least one luminescence means on and/or in a product carrier (110, 110'), wherein the security feature additionally contains, in and/or on the product carrier, at least one absorptive spectral filter means for luminescence radiation exiting from the at least one luminescence means, such that a colour impression results both under illumination with visible radiation and under luminescence illumination conditions.
