Abstract (en)

[origin: WO2014053755A1] The present invention relates to a tablet (21) intended for at least partially decomposing in an aqueous medium in order to release an active agent therein, including at least one first solid phase (22) including at least one powder mixture in compacted form, said powder mixture including at least said active agent, and at least one second solid phase (23), characterised in that said second solid phase includes at least one fabric in compacted form (27, 28). The invention also relates to the method for preparing such a tablet.
