Abstract (en)
[origin: WO2014053348A1] The present invention relates to an oven (1) comprising an oven cavity (2) wherein the ingredients to be cooked are placed, a casing (5) that surrounds the oven cavity (2), configured as a box with front side open, having a base (3) and two side walls (4), more than one guide (6) situated oppositely on the side walls (4), positioned at different cooking levels predetermined by the manufacturer and at least two telescopic rails (7) mounted on each of the opposite guides (6) whereon the tray (T) is placed and providing the tray (T) to be taken out of the casing (5) by being pulled in the horizontal direction, wherein the telescopic rail (7), which, when mounted on the lower guide (6) from the two guides (6) at different cooking levels, provides the tray (T) placed thereon to be positioned at the level of the upper guide (6).
