Abstract (en)

[origin: WO2014057211A1] The present invention concerns a device (1) for removing air contaminants, and more specifically a device intended to be used in an operating theatre. Said device (1) for removing air contaminants comprises a tube (2) of which one end (3) is blocked by the front face of a filter (4), said tube (2) further comprising openings (5) connected to a pump (6), upstream from said filter (4), characterised in that said end (3) has a frustoconical inner surface (7) of which the internal diameter reduces in the direction of said filter (4).
