Abstract (en)  
[origin: WO2014053338A1] The invention relates to a timepiece display comprising at least one mobile watch or timepiece component (1). The mobile component (1) is made from silica, quartz, single-crystal quartz, glass, sapphire, ceramic, a material that is partially transparent to visible or ultraviolet wavelengths or a transparent or translucent material that is at least partially amorphous, and said mobile component transmits or diffuses the light emitted by at least one light source (5) forming part of the timepiece display (4) or a movement (10) to which the display (4) belongs.
