Abstract (en)

[origin: US2014101042A1] Systems, methods, and computer-program products are provided for managing remote transactions. Applet data and transaction parameters are received from a mobile wallet platform over a communications network. The applet data and transaction parameters are communicated to a secure element. Transaction data is received from the secure element. The transaction data is transmitted to the mobile wallet platform over a communications network. The transaction data includes one or more of (1) an account number and (2) a verification code.
