Abstract (en)
[origin: US2015216279A1] A transport container includes a container body (14) and a container lid (12) pivotably mounted at the container body, with a multitude of guide rollers (58) at the container body (14) and a telescopic handle (64) spaced apart from the guide rollers (58), each at the side of the container body (14) opposite the container lid (12). A stacking frame (50) is attached to the rectangular container body (14), or is integrated into the rectangular container body (14). The container body (14) has rounded corners, but is free of supports or recesses (82) for guide rollers (58). The stacking frame (50) forms at least three stacking guides (52, 54), and the guide rollers (58) are mounted inside or at the stacking frame (50).
