Abstract (en)

[origin: EP2905389A1] The invention relates to a collecting tray for a drain, which collecting tray comprises at least a bottom provided with an outflow opening and comprises flanges adjacent to the collecting tray, which flanges are connected via a flexible part to the collecting tray. A collecting tray can further comprise a flat plate which is arranged under the bottom of the collecting tray and wherein the flexible parts are arranged on the edges of the flat plate.
