Abstract (en)
[origin: EP2905761A1] To readily and effectively take a crime and disaster prevention countermeasure, there is provided an information processing apparatus including an acquirer that, when a crime and disaster prevention assistant device is connected to a portable communication terminal, acquires specifying information for specifying the crime and disaster prevention assistant device from the crime and disaster prevention assistant device via the portable communication terminal, a driver executor that executes a driver program corresponding to the specifying information to control the crime and disaster prevention assistant device, and an application executor that executes a crime and disaster prevention application program corresponding to the specifying information to acquire status detection information detected by the crime and disaster prevention assistant device connected to the portable communication terminal, specifies countermeasure processing corresponding to the acquired status detection information with reference to a management database, and controls the crime and disaster prevention assistant device via the portable communication terminal based on the countermeasure processing.
