Abstract (en)

[origin: WO2014057306A1] The present invention relates to a quick release device (10) adapted to removably connect together a first and a second longitudinal tubes (118a, 122a; 118b, 122b) of a wheelchair (100), said quick release device comprising: - a first tubular element (12) fixedly connected to said first longitudinal tube (118a, 118b); - a second tubular element (14) fixedly connected to said second longitudinal tube (122a, 22b), said second tubular element being adapted to be telescopically received inside said first tubular element; - a clamping assembly (20) adapted to clamp said first tubular element (12) on said second tubular element (14) to prevent an axial movement of said second tubular element (14) relative to said first tubular element (12).
