Abstract (en)

[origin: WO2014057054A1] The invention relates to a closing cap (2) made of plastic for closing a container (3), comprising a head part (2a) and a jacket part (2b), wherein the jacket part (2b) is substantially shaped like a hollow cylinder and has a longitudinal axis (L), wherein the jacket part (2b) extends from the head part (2a) along the longitudinal axis (L), wherein the jacket part (2b) has an end segment (2f) at the end opposite the head part (2a), and wherein the closing cap (2) comprises a tamper-evident part (2e) and bridge parts (2i), wherein the tamper-evident part (2e) is arranged at a distance from the jacket part (2b) and is connected to the end segment (2f) of the jacket part (2b) by means of bridge parts (2i), and wherein the tamper-evident part (2e) is arranged in the direction of extension of the longitudinal axis (L) along the end segment (2f), such that the tamper-evident part (2e) is arranged at a distance from the jacket part (2b) in a direction radial to the longitudinal axis (L) and extends in a circumferential direction to the longitudinal axis (L) on the outside along the jacket part (2b).
