Abstract (en)
[origin: WO2014056548A1] The invention relates to a container building, comprising an interior space (39) having at least one container (12, 14), said interior space being delimited by a ceiling wall (28, 30), a bottom wall (32, 34) and a plurality of side walls (16, 18, 20, 22) which extend transversally to the ceiling wall (28, 30) and the bottom wall (32, 34). According to the invention, at least one of the side walls (16, 18, 20, 22) has an inner wall lining (44), in which a supply shaft (46) is integrated for receiving and mechanically guiding power supply lines, air supply lines, fuel lines and/or water lines, wherein the supply shaft (46) is covered with a cover strip (54) which separates the supply shaft (46) from the interior space (39) of the container building (10), and wherein at least one opening (56) for attaching connections to the power supply lines, air supply lines, fuel lines and/or water lines is provided in the cover strip (54).
