Abstract (en)

[origin: WO2014056549A1] The present invention relates to a container building having a first container (12) and a second container (14) which, for the purpose of forming a common box unit (39), are set up parallel to each other along a longitudinal direction (36) and are connected to one another, wherein the first container (12) has a first open longitudinal side (16a) and the second container (14) has a second open longitudinal side (18a) which are aligned parallel to each other and face one another, wherein the two open longitudinal sides (16a, 18a) are arranged at a distance from each other such that an intermediate space (38) is formed between them, and wherein, for the purpose of forming a continuous interior floor surface (40) of the common box unit (39), a floor element (42) is arranged as a connecting piece in the intermediate space (38) and extends in the longitudinal direction (36).
