Abstract (en)
[origin: WO2014060189A1] The invention relates to a composite weapon system (1) having at least one monitoring system (3) with a monitoring system control station (31), at least one active system (4) with an active system control station (41), and a composite control system (2) which is connected to the control stations (31, 41) of the monitoring (3) and active systems (4). The composite control system (2) has a computing unit (21) and a display device (22) which are designed to display data from the control stations (31, 41) of the monitoring (3) and active systems (4) and to display at least one input field (F09) for instructions for the control station (41) of an active system (4).
