Abstract (en)
[origin: CA2887626A1] The subject of the present invention is a method for carrying out firing practice, comprising a step of launching a target (1) into a portion of space, a step of firing a projectile towards the target (1) and a step of impact of the projectile on the target (1), characterized in that use is made of a projectile comprising a shell delimiting an internal volume containing a marking material and in that it involves a step of rupturing the shell upon impact of the projectile with the target (1), thereby releasing the marking material.
