Abstract (en)
The present invention relates to a waste compression arrangement (1) comprising a bottom plate (10), a waste container (20) for receiving waste, said waste container is arranged on the bottom plate (10), a compression plate (30) for compressing waste in the waste container (20), and at least one hydraulic cylinder (40) for moving the compression plate (30). The hydraulic cylinder (40) is arranged with a first end (46) attached to the bottom plate (10), and a second end (48) attached to the compression plate (30).
