Abstract (en)

[origin: CN104842632A] The invention relates to an assembly of a machine for processing a sheet or belt shaped printing substrate. The assembly includes a functional polymer (6) - a so-called smart polymer - to change a property of a component of the assembly. The assembly e.g. can be a roller (25). The component of the assembly is a roller sleeve (26). The property, which is changed, for example, can be a diameter.
