Abstract (en)
[origin: CN104852104A] The invention relates to a boat drive which has a motor and coolant line in thermal contact with the motor, wherein a pump is arranged to pump coolant for cooling the motor through the the coolant line. Other components to be cooled are arranged to be cooled through the boat drive, and the coolant line is in thermal contact with the components. The invention further relates to a method for cooling components on a boat.
