Abstract (en)

[origin: WO2014060909A1] A method and an apparatus for loading and transfer of tubular textile products onto a toe-closer machine (50) for production of tights, comprising steps of: predisposing at least a hose loader (2) provided with at least a reference portion (3); at least partially loading a tubular product on the at least a hose loader (2), externally enveloping the tubular product on the hose loader, such that a reference position of the tubular product is aligned to, and/or orientated with respect to, and/or corresponds with, the reference portion (3) of the hose loader (2); positioning the hose loader (2) at and/or aligned with a hose holder (51) of a toe-closer machine (50), in such a way that the reference portion (3) of the hose loader (2) is aligned to, and/or orientated with respect to, and/or corresponds with, a specific portion of the hose holder (51); automatically transferring the tubular product from the hose loader (2) to the hose holder (51) by turning the tubular product inside-out and enveloping the product externally onto the hose holder, while maintaining the respective reference position of the tubular product aligned to, and/or orientated with respect to, and/or corresponding with, the specific portion of the hose holder.
