Abstract (en)

[origin: WO2014053725A1] The invention concerns a flange for fastening at least one injector to a cylinder head of a motor vehicle combustion engine. The flange (1) is characterised in that the fork (2) of same has an outer periphery forming a stepped cylinder comprising a first cylindrical portion (11) arranged beneath a second cylindrical portion (12), the diameter of the first cylindrical portion (11) being smaller than the diameter of the second cylindrical portion (12). The invention can be applied in the motor vehicle industry.
