Abstract (en)

[origin: WO2014060181A1] A protection circuit arrangement for a multi-voltage power supply is presented. It comprises a DC-DC converter (102), which is provided in the region of transition between a high-voltage loop (110) and a low-voltage loop (112), at least one switch being provided in both the high-voltage loop and in the low-voltage loop.
