Abstract (en)

[origin: EP2910726A1] A light adjusting roller blind device has a support assembly (10), and a driving assembly (20), an adjusting mechanism (30) and a blind assembly (40) mounted on the support assembly (10). A blind (41) of the blind assembly (40) can be adjusted by simply detaching a second holding part (35) from a first holding part (34) and then releasing a first rope (36). The blind (41) can be stably lowered along with the releasing of the first rope (36). Therefore, it is easy and convenient for the user to adjust the blind (41) of the light adjusting roller blind device.
