Abstract (en)

[origin: WO2014066738A1] A vacuum bag attachment assembly for a vacuum cleaner includes a housing member connectable to the vacuum cleaner. A locking handle is movably connected to the housing member and movable between first and second positions. An opening in the locking handle receives a fitting of a vacuum bag. Moving the locking handle between the first and second positions connects and disconnects the vacuum bag and the attachment assembly.
