Abstract (en)
[origin: WO2014067867A1] The invention relates to a roller crusher, in particular an eccentric roller crusher, comprising a rotatable crusher roller (1) and a moveable device (2) which separates by screening. According to the invention, said device (2) which separates by screening is supported on one side, on a stationary abutment (8) and on the other side on at least one supporting surface (9) of the crusher roller (1). The movement of the crusher roller (1) causes the device (2) which separates by screening and which is supported on the supporting surface (9) to vibrate.
