Abstract (en)

[origin: WO2014064199A1] The invention relates to a wiping system for a windshield, in particular of a motor vehicle, comprising a wiper (1) for said windshield and a device for spraying the windshield in a direction transverse to a direction of longitudinal extension of said wiper. Said system comprises means (50) for deflecting a flow of air from an incident direction, approximately parallel to said direction of longitudinal extension of the wiper, into a direction transverse to said incident direction.
