Abstract (en)

[origin: WO2014064343A1] A device for combining the clutch pedal and the acceleration pedal into a single novel pedal. The invention concerns a device that makes it possible to discard the clutch pedal, keeping the clutch system that will function with a novel pedal that operates the acceleration and the clutch at the same time. It consists of a single pedal that accelerates the car and, at the same time, turns a cam (figure 1) to connect and disconnect the clutch disc. The device according to the invention is intended for cars.
