Abstract (en)

[origin: WO2014065816A1] A ferrule package includes a plurality of ferrules and a packaging device configured for containing the ferrules in a uniform orientation. A selected ferrule may be removed by moving an aperture into alignment with a receptacle containing the ferrule inserting an insert such as a tube into a bore of the ferrule, and removing the selected ferrule from the receptacle while the ferrule is on the insert. The ferrule may be removed without making contact with the ferrule.
