Abstract (en)
[origin: WO2014068233A1] The invention relates to a method for the production of flat glass, comprising: (a) impregnation of a glass textile with a molten-glass composition, the glass forming the fibres of the glass textile having a softening temperature above that of the glass forming the molten-glass composition, said step (a) comprising (a1) the impregnation of the glass textile with a glass frit composition and (a2) the heating of the impregnated glass textile obtained in step (a1) to a temperature above the softening temperature of the glass frit; (b) the cooling of the impregnated glass textile obtained in step (a) such as to obtain a glass sheet. The invention also relates to a glass sheet produced using such a method.
