Abstract (en)
[origin: WO2014064364A1] The invention relates to a geotextile structure, in particular for reinforcing and/or stabilising soil and embankments, comprising at least one tubular part (102) that can be filled with a granular material that is confined therein, said tubular part being associated with a mat (103) for anchoring the structure-forming assembly in the soil to be stabilised or in the embankment to be reinforced.
